# COMPSCI-235-FLIX Journal

https://github.com/Ekelien/COMPSCI-235-FLIX.git
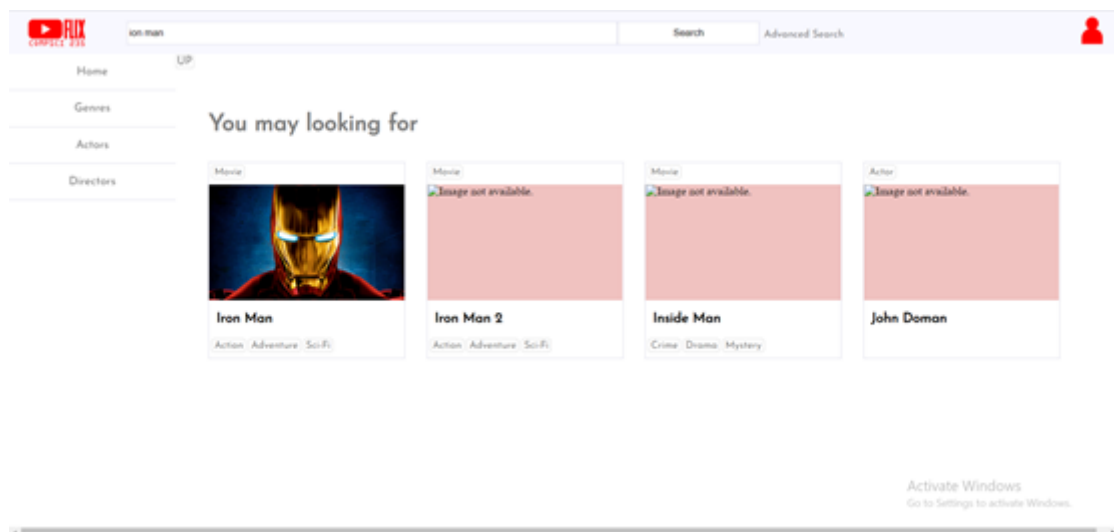

Basic Function
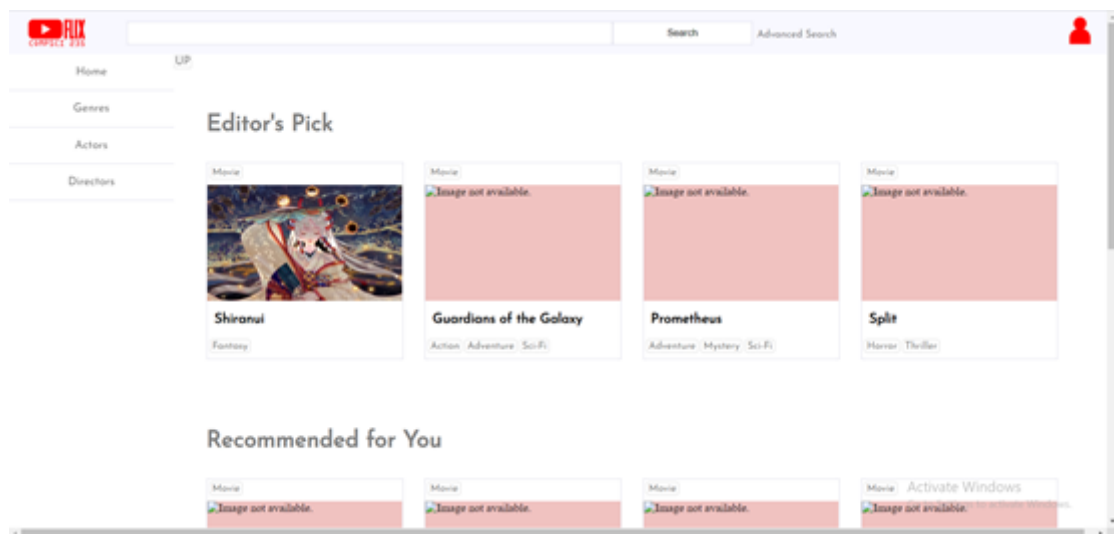

A fantastic YouTube like web application, has Editor's Pick and Recommended movies - for your preference in the Home page.

You can also visit Genres, Actors and Directors. There is guide index that let you access those more conveniently.
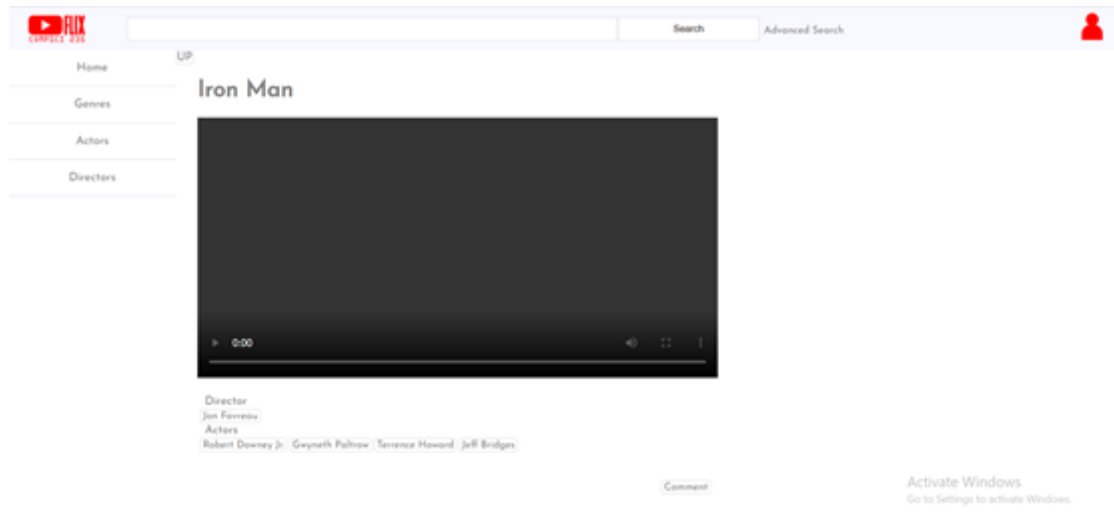

Search

Of course, you can search movies, actors, or directors as you wish ... oh, I type it wrong, it is "iron man" not "ion man"! But the application will show all similar result! Great!

- The Advanced Search is not available yet.

User Service

You can watch the movie, see and check out who direct and who participate in this movie. You can also leave a comment - but you have to have an account.

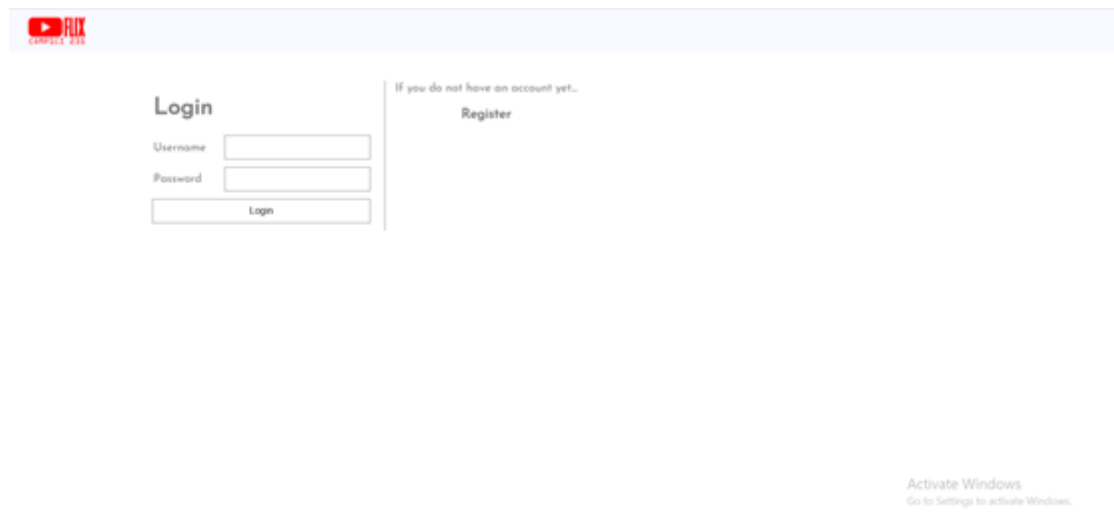

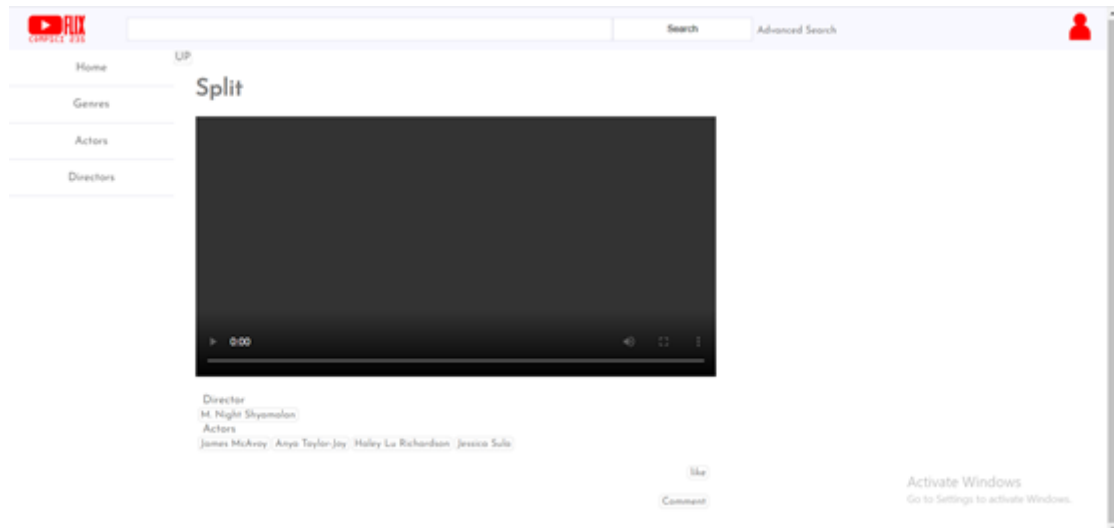

Click the user button on the top right, the application will lead you to login page. If you do not have an account, you can also turn to register page.

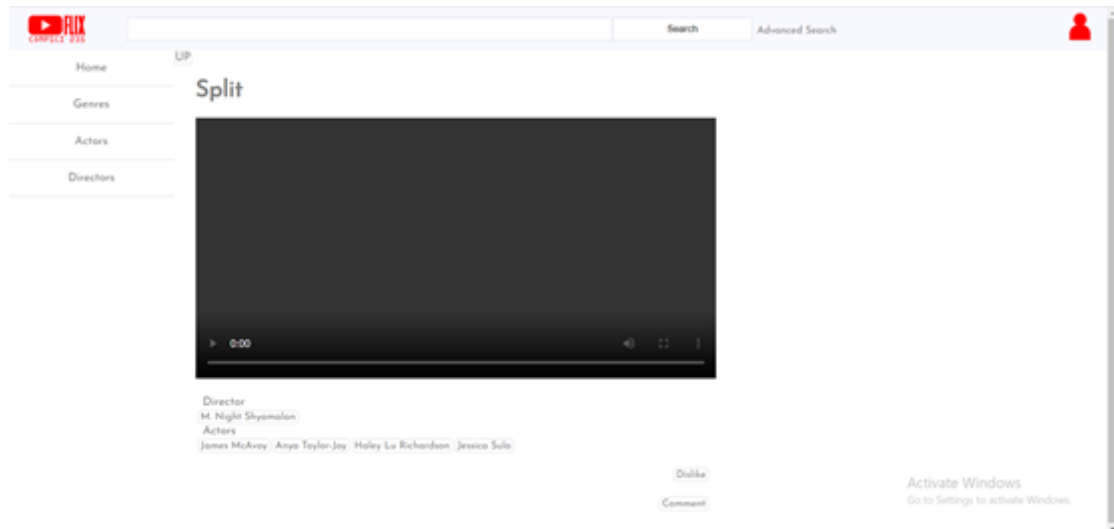

Favorites

After logging in, you can not only comment the movie, but also "like" the movie if you really enjoy it.

Of course, you can dislike it if you meet a better one.

Click the user button again, it will lead you to user home page - as user super , I have three favorite movies, and you?
